## LEARNING OBJECTIVES

### Be ready to take your PMP® Certification

In the last decade, most organizations have adopted project management as the method of choice to implement organizational strategies and manage change. Project management is ideally suited to manage short-term, resource-limited actions in a complex and turbulent environment.

Through an **interactive mix of theory and practical exercises**, the learning experience promotes the overall understanding of today's organizational project environment. Participants develop a shared common project vocabulary to run projects that align to the PMI framework that includes Predictive, Hybrid, and Adaptive approaches.

Offered by the Project Management Institute and based on the PMBOK® Guide, the PMP® (Project Management Professional) certification is a globally recognized certification for project managers and is relevant to a wide range of industries.

### Our 5-day training will allow you to:

- Demonstrate understanding of the knowledge and skills to lead and direct project teams to deliver results that clearly contribute to value for the business within established parameters.
- Acknowledge responsibility for tailoring all aspects of the project for the life of the project and not only lead and direct the project, but also engage all team members from predictive to adaptive.
- Understand how to ensure that all of the aspects of the project plan are developed and executed and that progress and variances are properly addressed and communicated in different contexts.
- Become acquainted with the *PMBOK® Guides'* process groups, knowledge areas, as well as principles and performance domains.
- Familiarize yourself with the new format of the PMP® Examination and study material
