Why becoming CISA certified?

- Being CISA certified means being able to carry out IT audit processes, take charge of the governance and management of IT technologies, as well as the acquisition, development and implementation of IT systems for the company.
- It is also able to ensure the resilience of the business and IT systems, and the protection of data. CISA certification is highly recognised in the field of **cybersecurity**.
- The main mission of an IT audit expert is **to prevent fraud, avoid unnecessary expenditure and ensure corporate compliance**. If an anomaly is discovered, a report is drawn up for the organisation's management.
